EuSoMII and IHE-Europe Join Forces to Advance Interoperability and Innovation in Medical Imaging Informatics

Vienna, 3 July 2025 – The European Society of Medical Imaging Informatics (EuSoMII) and IHE-Europe are pleased to announce a new collaboration as EUSOMII becomes an official member of IHE-Europe. This partnership brings together two European organizations committed to shaping the future of healthcare through interoperability, standards, and innovation.

EUSOMII and IHE-Europe share a common goal—to promote the knowledge and experiences that empowers better clinical decision-making, fosters AI development, and supports cross-border health initiatives. While EuSoMII focuses specifically on the unique IT needs and standards within radiology and medical imaging, IHE-Europe champions interoperability across the entire healthcare spectrum. Together, the two organizations aim to bridge the gap between clinical needs and IT solutions.

Sergey Morozov, EuSoMII Chair Society's Partnership Committee 2025-2027 said: "By joining IHE Europe and participating in events like Connectathons, EuSoMII provides essential clinical feedback. This collaboration helps develop standardized frameworks, such as AI Workflow (AIW) and AI Results (AIR), to ensure AI tools are transparent, reliable, and integrated smoothly into daily clinical practice."

"We warmly welcome EUSOMII into the IHE-Europe community," said Marc Kämmerer, IHE-Europe liaison to EuSoMII. "This partnership comes at a crucial time for the digital transformation of healthcare, where data exchange, interoperability, and intelligent systems intertwine for improving diagnostic quality and enhancing efficiency."

Together, EuSoMII and IHE-Europe are committed to create an innovative ecosystem that combines interoperability leadership and medical imaging informatics expertise, ultimately improving patient care.

About EUSOMII

The European Society of Medical Imaging Informatics (EuSoMII) is a non-profit healthcare organization that aims to connect radiologists, radiology residents, radiographers, data scientists and informatics experts, also welcoming other specialties that use imaging such as pathology, dermatology and ophthalmology.

About IHE Europe

The mission of IHE-Europe is to improve patient care by advancing the interoperability of healthcare IT systems and the appropriate sharing of relevant information. Towards that end, IHE-Europe conducts education, testing, demonstrations and other activities promoting the deployment within Europe of systems compliant with the IHE Technical Frameworks developed by IHE International. IHE-Europe interacts with relevant governmental and non-governmental organisations in Europe. It also maintains close contacts with similar initiatives around the world.
